

FOR IMMEDIATE RELEASE

Growing focus on energy efficiency to boost demand for power capacitors in India, finds Netscribes

Netscribes (India) Pvt. Ltd., launches a report on the Power Capacitors Market in India 2011 as part of Netscribes' Power Equipment Industry report series.

Mumbai, India – January 12, 2011 – Netscribes (India) Pvt. Ltd., a knowledge consulting solutions company, announces the launch of its Power Capacitors Market in India 2011 report. Capacitors form a small part of the electrical equipment industry in India. Its contribution to the overall industry is growing with increasing focus on energy efficiency in India. Power capacitors help to reduce the overall power factor (PF) of the system and as such they form a very important part of energy efficient systems. This mechanism is boosting the demand for the same in the market as a result of which the production is increasing steadily. Power being an important sector for India proves to be an important driver for the market. Government is readily helping the sector through increased initiatives. Low tension capacitors form a greater market than high tension ones owing to the overall growth in industrial sector in India. Exports in the market are rapidly growing with countries like Germany, China, Turkey and Spain being the largest importers. Technology orientation, however slow, is propelling growth and popularity of Indian products. Expanding economy is fueling growth in the overall market.

The report begins with an introduction to power capacitors market providing a brief description along with the types that are functional in India. It gives a clear overview of the uses of capacitors in the market. The market overview section provides an insight into the market as well as the market size and growth of capacitors on the basis of volume. Market segmentation on the basis of types is highlighted. The size and growth of the market on the basis of value has been added along with the product segmentation. Import and export figures of capacitors in the Indian market have been incorporated.

An analysis of the drivers explains the factors for growth of the industry including growing focus on energy efficiency, growth in wind power sector, government initiatives and growing use of metallised polypropylene (mPP) technology. The key challenges include raw material costs and supply, technological backwardness and archaic business practices of state electricity boards.

The competition section provides an overview of the competitive landscape in the industry along with market share of players in LT and HT capacitors segment on the basis of volume respectively. It includes a brief profile of the major players in the market including their financials.
