

# THE VIEW

Technology Insights | August 2021

75% of US companies now rely on public cloud platforms, and a quarter of them plan to move all infrastructure and apps to the cloud. As they navigate the digital transformation journey, most enterprises face two major challenges: Not all applications and data can easily migrate to cloud networks. Plus, misconfiguration or unauthorized access can quickly lead to cloud security breaches.

Amid inevitable challenges, how can your enterprise achieve peak cloud success? In this edition of The View, discover how you can harness the true potential of emerging technologies and concepts for a cloud-first, IoT-driven future. Additionally, we share with you the biggest cloud-related tech acquisitions of the first half of 2021.

## Boosting a cloud-first enterprise

### **5G Edge: Implications for enterprises**

90% of industrial enterprises will utilize the 5G edge ecosystem by 2022. Here's how 5G Edge can lead your business towards an agile, efficient, and IoT-driven future. >>

### **Benefits of multi-cloud deployments**

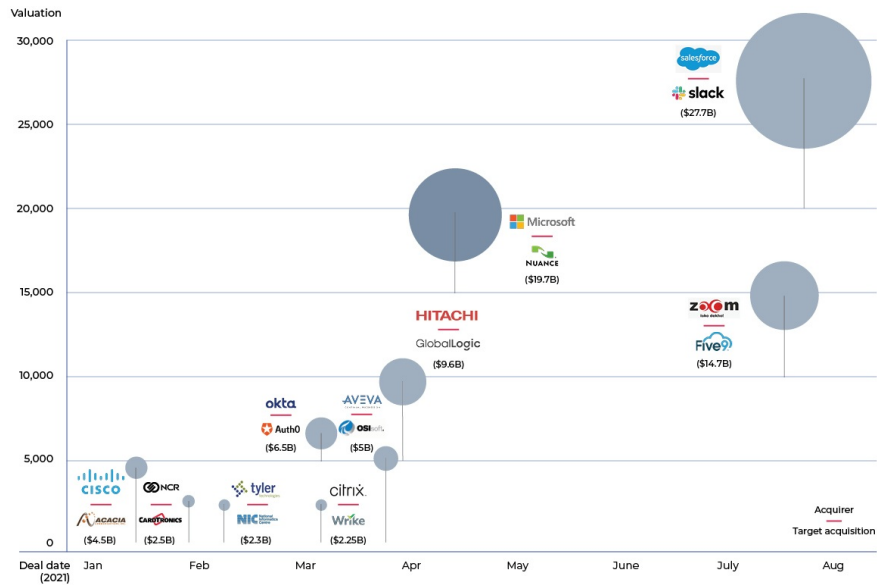

Organizations prefer to work with multiple private and public clouds to deploy their applications. Learn how this best-of-breed solution can help your enterprise. >>

### **SASE: Bringing cloud security to SD-WAN**

A new network category known as Secure Access Service Edge (SASE) has emerged as a remarkable solution to cloud challenges that enterprises with traditional SD-WAN face. >>

## Top 10 cloud-related technology acquisitions of 2021 till date

Recently announced global deals suggest that companies are using a [3-stage M&A analysis](#) to further improve customer stickiness during this time of technology disruption. To learn how your company can benefit from our insight-driven innovation insights, [contact us](#) today.

### Through the lens of industry experts

*“With a strong hybrid cloud strategy, organizations can harness the power of cloud-native applications to achieve faster data insights, increased employee productivity, and better customer experiences.”*

- Srinivas Rao, Senior Director - System Engineering, Dell Technologies
